W. W. BOYER

Nurseryman and Fruit Grower

BIGLERVILLE, ADAMS COUNTY, PA.

TELEPHONE 135 R 11

PRICE LIST

LOCATION

Our nursery is situated in the heart of the Adams County Fruit Belt, 10 miles north of Gettysburg, midway between Cashtown and Arendtsville, on hard surfaced road 1001.

Certificate of nursery inspection accompanies each shipment of nursery stock.

We are issuing this circular, giving time of ripening and description of fruit, also suggesting where some varieties should be planted, in the hope that it may be helpful to customers in placing their orders.

VISITORS ALWAYS WELCOME

APPLE TREES

Prices on Standard Apple Trees, 2 years old, assorted kinds: 1 to 10 trees at the each rate; 10 to 50 trees at the 10 rate; 50 to 350 at the 100 rate; 350 to 1,000 or more at the 1,000 rate.

	Each	10	100	1,000
Extra select, 5 to 7 ft., 1 1/16 in. up	\$0.50	\$4.00	\$25.00	\$220.00

First class, 3 to 4 ft., 7/16 to 9/16 in.40	3.00	18.00	160.00

VARIETIES

BALDWIN—An old-time favorite winter apple, medium size, mottled red and yellow. Reaches perfection in northern Pennsylvania and New York, but is well and favorably known throughout this section.

RED DELICIOUS—A winter apple of fine quality, brilliant red shading to yellow at the blossom end. Flavor and appearance make it one of the most popular box apples.

DUCHESS OF OLDENBURG—Usually known as Duchess. Summer apples, ripening about the last of July. Skin yellow streaked with red, flesh white and juicy, sub-acid. Good cooker and shipper, does well on low ground.

EARLY RIPE—One of the earliest summer apples, ripening from the first to the middle of July, good size, pale yellow in color.

GRIMES GOLDEN—Top worked 5c per tree extra—This is one of the most popular of the fall apples, it is ready for use about the middle of September, but because of its excellent keeping qualities and striking appearance is largely used for the holiday trade. Skin a rich golden yellow, flesh yellow and spicy, the trees come into bearing early and can be used as fillers. Do best on low ground.

JONATHAN—This is the first high quality red apple to come on the market. Ripens from the middle to the last of September, but can be kept far into the winter. It is a brilliant red with white, juicy, fine-grained flesh. The trees come into bearing early and continue to bear heavily and consistently. Do best on high ground.

McINTOSH—A late fall apple of good keeping qualities. It is bright red in color and of good size, popular for shipping and demands high prices, early bearer, much used as filler.

ROME BEAUTY—A winter apple of the first quality, exceptionally good appearance being large in size and mottled and striped in various shades of red, late keeper. An excellent baking apple.

SMOKEHOUSE—An early fall apple that is an old-time favorite in Pennsylvania, good size, mottled red and yellow, flesh is yellowish-white, rich and aromatic, trees hardy and long lived, bearing trees 70 years of age and over being no exception. Demand and prices are always good.

SUMMER RAMBO—The king of summer apples, ripens in August and can be held until winter. Very large in size, greenish yellow streaked with red, flesh tender, mellow and of excellent quality. It is extremely popular on the markets and commands high prices. Tree is a strong grower and an annual bearer. Does well on low ground.

STAYMAN WINESAP—One of the best winter apples, season is from December 1st to late spring, good size, dark-red skin tinged with yellow, flesh crisp, juicy and of finest flavor. Appearance and flavor make it a favorite of the high-class trade. Trees vigorous, do well in poor soil.

WEALTHY—Fall apple ripening the latter part of August, red skin, flesh white and juicy, medium size, trees bear young and do well in low ground.

WINTER BANANA—Creamy white with rosy cheek, excellent for home use, but not good for large commercial plantings.

WINTER RAMBO—Medium size, streaked red and yellow. Flat in shape. October to December.

WINTER SWEET PARADISE—Yellow with rose cheek, the best sweet winter variety.

YELLOW TRANSPARENT—Early summer, ripening early in July, skin a clear yellow, flesh white, juicy and slightly acid. The trees bear young and may be planted close, do well in low ground.

YORK IMPERIAL—The old reliable winter apple. Medium to large in size, skin greenish yellow overlaid with red and under favorable conditions gets a solid red. The flesh is juicy and slightly coarse, good canner and shipper and the best of keepers. The trees are hardy and bear heavily and consistently, it is easily the greatest commercial apple in Pennsylvania.

PEACH TREES

1-year-old, assorted kinds: 1 to 10 trees at the each rate; 10 to 50 trees at the 10 rate; 50 to 350 at the 100 rate; 350 to 1,000 or more at the 1,000 rate.

	Each	10	100	1,000
Extra select, 4 to 6 ft., 9/16 in. and up	\$0.35	\$3.00	\$18.00	\$150.00
First class, 3 to 4 ft., 7/16 to 9/16 in.30	2.75	14.00	125.00
First class, 2 to 3 ft., 5/16 to 7/16 in.25	2.00	11.00	90.00
First class, 1½ to 2 ft.20	.85	7.00	50.00

VARIETIES

Varieties are listed in order of their ripening

MAYFLOWER—White, semi-cling, red cheeked and exceptionally early ripening about July 1st. Not good for large plantings, but valuable for home and market because of its season.

GREENSBORO—Best early variety. Flesh white. Large and beautifully colored. July.

UNEEDA—Large, white-fleshed freestone peach. July 15 to Aug. 1.

ROCHESTER—Yellow, free, yellow flesh of the type of the Crawford. Ripens a week or two before the Elberta. A new introduction in this locality, but already popular in some sections.

SOUTH HAVEN—Brilliant yellow with blush of red. Splendid flavor. small seed, freestone. Ripens two weeks before Elberta.

GOLDEN JUBILEE—Developed and introduced by the New Jersey Experiment Station. A yellow, early freestone peach, ripening about three weeks before Elberta, and of good quality. One of the best new varieties.

CARMAN—White, semi-free stone, yellow white skin well covered with red, flesh white, slightly tinged with red, ripens about the last of July, first reliable commercial peach.

HILEY—White, free, yellowish, white skin with deep-red cheek, flesh white and very juicy, ripens just before the Belle of Georgia, colors well before ripening and is a good shipper. Trees are hardy.

FULTON—White, free, very large, creamy-white coloring to a beautiful red. Ripens August 10th to the 25th; for appearance and flavor they are hard to beat and being a heavy bearer they make a fine market peach. Will not hold well for long shipments.

BELLE OF GEORGIA—White, free, usually known as Belle, it is creamy white with a red cheek. The flesh is white with some red near the pit, best all around white peach on the market. Good shipper, ripens August 1st to 15th.

ELBERTA—Yellow, free, large in size, yellow skin with deep red cheek, flesh is golden yellow, red at pit, firm and juicy, ripens from August 15th to September 1st. This peach is as near perfect for commercial purposes as has yet been found, the size is large and uniform and the flesh, although juicy and tender, is firm enough to stand long hauls and hold its shape in canning. Easily the leader among the commercial peaches.

J. H. HALE—Yellow, free, very large in size. Skin a dark yellow, coloring to red and without fuzz. Flesh a deep yellow, firm and of excellent quality, ripens just after the Elberta; this is a comparative recent introduction and has caused quite a stir among the trade. For appearance it is without equal and it grows to perfection in Adams county. Good crops have been produced regularly when all other varieties froze and growers have realized handsome profits.

CRAWFORD'S LATE—Yellow, free, a large, yellow peach of excellent quality, fine for canning, ripens about September 1st.

MATTHEW'S BEAUTY—A late Elberta. A money-maker on the late market.

BEER SMOCK—Yellow, freestone, an old-time favorite ripening about the middle of September, flesh dense, rich and good.

SHIPPER'S LATE RED—Freestone. Fine yellow peach. As large as Hale, a much heavier bearer.

IRON MOUNTAIN—White, free, yellow skin with deep red cheek, flesh white, best late white variety. Ripens about October 1st.

HEATH CLING—White, cling, good size, skin and flesh white with a slight tinge of crimson. The flavor is characteristic and delightful and it is deservedly popular among the housekeepers for canning, ripens about October 1st and keeps almost like apples.

SALWAY—Yellow, free, an excellent and well tried late peach, ripening about the last of September.

KRUMMEL—Yellow, the best late peach.

PEAR TREES

2 year, 5 to 6 ft. Each \$.60 Per 10 \$4.00

VARIETIES

BARTLETT—Large, yellow pear, with delicious flavor and ready for eating early. Good bearer, the favorite summer pear.

CLAPP'S FAVORITE—Large, yellow and dull red. Ripens in August.

D'ANJOU—Large, green in color, yellowing when ripe. Very juicy and luscious, splendid for late fall and winter.

KIEFFER—Favorite winter pear. Large fruit, yellow skin with light vermilion cheek, heavy bearer, good keeper.

SECKLE—The finest flavored pear on the market. Small in size and very sweet. Ripens in September.

NOTICE TO PURCHASERS

We use the greatest care to have our stock reliable and true to name, and will on proper proof, replace anything that may not prove true to name. We do not give any warranty. It is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible, from any cause, for more than the original cost of the trees.

We have had 25 years' experience in growing fruit and have 100 acres in fruit and nursery stock. Practically all our nursery stock is budded and grafted from our own bearing trees.

No Charge for Packing or Delivery to Railroad.

TERMS—Cash with order or satisfactory reference.

A discount of 5 per cent allowed on all orders when cash accompanies the order.
